Regression Modeling Strategies

Frank E. Harrell, Jr., Ph.D., Professor and Chair

- **Requirements**: strong competence in multiple regression models. Target audience: statisticians and related quantitative researchers who want to learn some general model development strategies, including approaches to missing data imputation, data reduction, model validation, and relaxing linearity assumptions.

- **Details**: [http://biostat.mc.vanderbilt.edu/rms](http://biostat.mc.vanderbilt.edu/rms)

- **Contact**: diane.kolb@vanderbilt.edu
